315Lb Woven Fabric

315Lb Woven Fabric

Part#: WF315

 [WF315.jpg](#) [1]

Woven geotextiles are used to hold soil in place. They can also be used under Rip Rap, Gabions or precast block. Woven geotextiles are a time and money saving alternative to traditional methods using graded aggregate or sand filters. They prolong the surface life and stabilize the foundation while providing a rugged separation layer between aggregate and subgrade.

Specifications
